PROJECTS

Inventory Management System

This inventory management system, developed in Java, stands out for its seamless integration of real-time stock tracking and automated reorder alerts, ensuring zero stockouts. With an intuitive user interface and role-based access control, it simplifies inventory oversight while maintaining high data security. Advanced reporting features provide actionable insights, making inventory management not just efficient but also strategically impactful.

Institute Management system

This institute management system, built in .NET, streamlines the operations of a coaching institute by automating student enrollment, fee management, and attendance tracking. It features a user-friendly dashboard for administrators, teachers, and students, allowing for efficient scheduling, performance monitoring, and communication. The system's robust architecture ensures scalability and data integrity, while integrated reporting tools provide valuable insights into student progress and institute performance.
